- Understanding your obligations coming from the Grant Agreement and the Consortium Agreement is the essential first step before your project starts. This presentation will introduce those articles of the GA and sections of the CA that need to be considered by the coordinator to make sure the project coordinator can **handle (un)expected events** – like non-performing partners, IP conflicts, delays, reallocations in the budget, overspending and underspending partners. We will discuss the same for the **lump sum** projects.

- Having a good project management system (for monitoring and reporting) supported by clear and practical tools will enable you to efficiently deliver your project results. We will show you the essential tools that we crafted based on our extensive experience with managing projects and various consortia: internal technical and financial report; budget spending monitoring; IP management, data management, assessing the D&C activities of the partners.

In this session we will go through these so reporting to the EC is easy.
